Art Unit: 3662

1. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 1, line 4, "said location detection part" lacks antecedent basis.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-8, 10-13, 16-17, 19-26, 30-42 are rejected under 35 U.S.C. 102(e) as being anticipated by Stewart (Pat. No. 5,969,678)

Stewart teaches a system and a method including a portable computer 5 having a processor, an information detection part 5 and a communication part 6, 45 the portable computer acquiring at least a plurality of items of information that are sensed by the location detection part, and the communication part communicating the plurality of items of information to a remote server, and obtaining current position information, indicative of a user's current position, which position information is based on the information from the remote server 10, 15, 20.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
